

ULTI impress™
The Ultimate Switch

Creating splendour...

Schneider
Electric

The art of impression

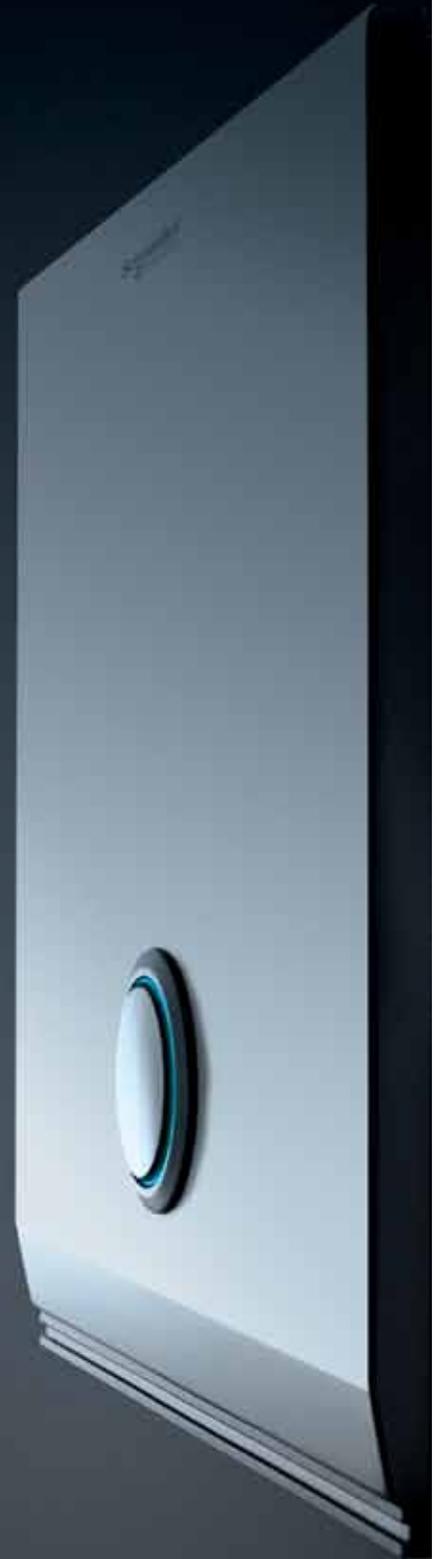

ULTI is for those who seek the haute couture in space design. Marrying the highest aesthetics in cosmopolitan décor and superb functionality in the art of fine lighting, the award-winning ULTI range delights your vision with pure pleasure, and lights up your senses with splendour... bringing you to another level of inspired living.

A beautiful face that endears and endures

With its ultra-clean lines, sleekly chic square profile and instantly identifiable round dolly, ULTI blends two contrasting geometries to create modern simplicity of unprecedented freshness.

The design overcomes the clutter of a large central mechanism or the redundant lines of a surround frame. It results in maximum scope to showcase the synergy of color, material and finish in a standard-sized wall plate. Adding the final touch, ring-shaped LED locators glow pleasingly to guide you to your switches at night.

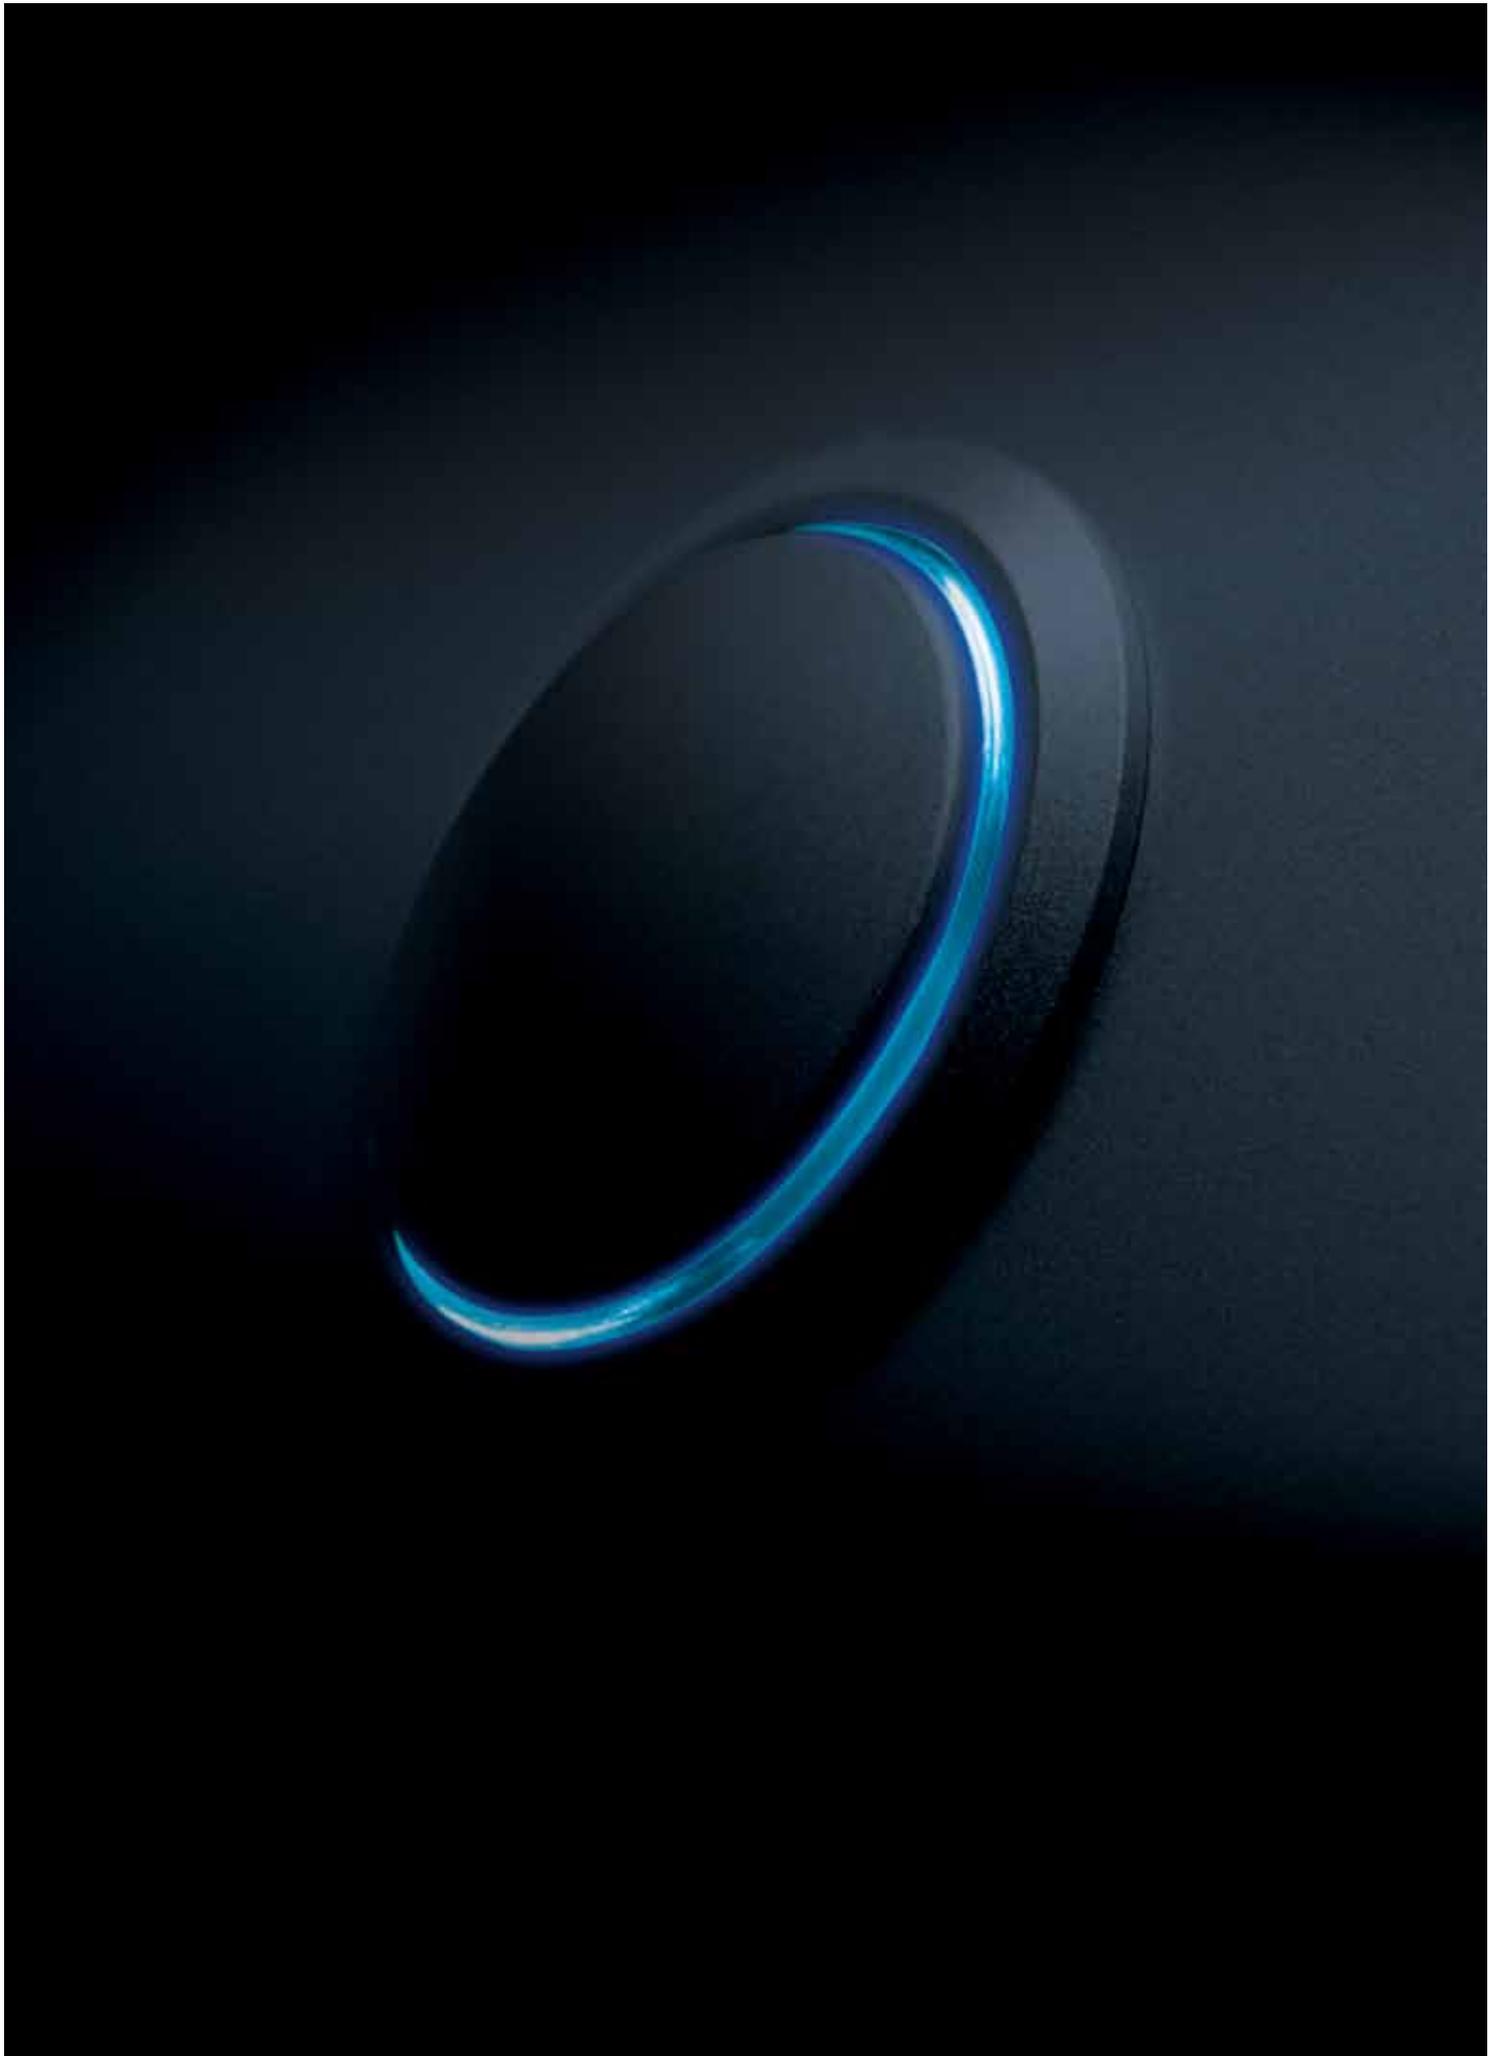

A wealth of creative possibilities

See your imagination come to life with our metal, crystal glass, champagne gold, brushed silver and pearl white finishes. Or create your own masterpiece with our made-to-order service and bring art into your space.

* Metal and mirrored finishes are exclusive to ULTI i.m.press switches and sockets.

The real measure of beauty and ingenuity...

A new physics, the same art

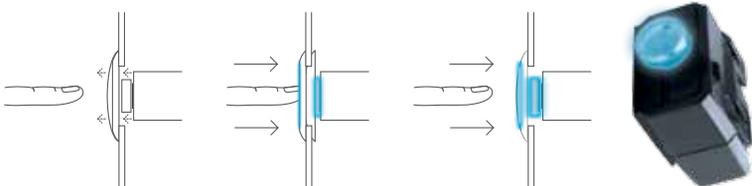

Transferring the artful conception of ULTI's original design from RF scene control electronic wall plates to other ULTI products was a real challenge. The limitations of common rocker mechanisms meant that this was especially true of everyday electro-mechanical switches.

Empowered by the patented i.m.press mechanism that sets free the design paradigm, ULTI mechanical switches now look and perform every bit as stylishly as their electronic counterparts... a desire fulfilled for the connoisseur of design.

iso-motion-press mechanism

ULTI's unique iso-motion-press (i.m.press) mechanism ensures switches stay in a uniform position and can be swiftly and surely operated with a simple motion. With dollies maintaining the same position whether on or off, i.m.press empowers the world's first ever fully flush-faced 250V-rated mechanical switch.

Moods...

Walls, ceilings, floors and furnishings are the building blocks that make houses. But only lighting can create the subtle moods and soulful ambience that illuminates and infuses one's surroundings with character and life.

Total control...

Imagine how much simpler and more satisfying life would be if you could control all your security systems, AV equipment, household appliances, air conditioning and heating, connectivity hardware, and lighting control via just one ultra-sleek remote controller! The ultimate in centralised, intelligent control and automation, ULTI makes it all happen so stylishly!

Dynamic Labelling Technology (DLT) Input Unit

The remarkable Dynamic Labelling Technology Input Unit features editable LCD text, icons and bar graphs for easy identification and control. It also enables you to programme up to eight scenes and labels them in the precise manner you wish.

... for your life

And enjoying full control is only half the story. With ULTI, you can make life happen in any way your routine demands.

Now, entertainment is no longer confined to your sitting or music room; sensors monitor and instantly inform you of potential mishaps around your home automatically; household systems such as air conditioning and lighting “wake up” and work according to your precise wishes. Best of all, you’ll also enjoy the unique peace of mind of being able to remotely access, monitor and control your home from anywhere and at anytime.

Living stylishly, living well and being 100% eco-friendly – that’s the beauty of ULTI!

C-Bus™

C-Bus™ converged intelligence

C-Bus Technology™ is a futuristic alternative to conventional wiring that delivers extra functionality. This microprocessor-based system enables integrated control and management of virtually any type of electrical load, digital and analogue. You can set the operating variables and control relationships between C-Bus linked units. The system’s innovative modular design and distributed intelligence also enhances set-up, maintenance and scaling efficiency with a single connection controlling an unlimited number of devices and open protocol architecture ensuring unrivalled interoperability. With C-Bus, you’ll never have to worry about control and integration of various devices being compromised by differences in origin, technology or brand.

A tech-chic room for the “bleisure” age

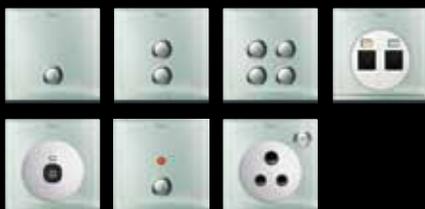

With business and leisure blurring like never before, “going the extra mile” for discerning travelers means creating a genuinely extraordinary “bleisure” experience that will invariably be rewarded with dazzling smiles from your guests.

Product Specifications

Mechanical switches and sockets

Switch

- 250V 1 / 2 / 4 Lever 1 Way 16AX "i.m.press" Switch
- 250V 1 / 2 / 4 Lever 2 Way 16AX "i.m.press" Switch
- 250V 1 Lever Bell Press Switch
- 250V 1 Lever 20A "i.m.press" Double Pole Switch

Socket

- 250V 1 Lever 16A Switched Socket

Voice Data Information

- 1 Lever TV Socket
- 1 Lever TV / FM Socket
- 1 Lever Telephone / Data Socket
- 2 Lever Telephone and Data Socket
- 1 Lever RCA / S-Video Socket

Other

- 1 Lever Blank Plate

The ULTI i.m.press range is available in the following "Colour Options"

Socket

Universal Shaver Socket,
115/240V

About Schneider Electric

As a global specialist in energy management with operations in more than 100 countries, Schneider Electric offers integrated solutions across multiple market segments, including leadership positions in energy and infrastructure, industrial processes, building automation, and data centres/networks, as well as a broad presence in residential applications. Focused on making energy safe, reliable, and efficient, the company's 114,000 employees achieved sales of more than 18.3 billion euros in 2008, through an active commitment to help individuals and organizations "Make the most of their energy".

The Installation Systems & Control Division of Schneider Electric provides solutions that represent the best in lifestyle and innovation for offices, hotels and homes. These solutions include award-winning products in the areas of building and home automation, structured cabling, and designer switches and sockets. They help the finest architectures around the world to achieve more with less.
